Fulfillment

Defining the Warehouse environment & processes to best meet the Customer's Expectations

Custom Goods Class A warehouses with RF coded, racked inventory facilitates documented picks to match orders and links orders for shipping with bill of lading documentation. The EDI-Electronic Data Interchange allows customers to automate receiving and shipping order requests electronically. RF Code scanners and Hand-held Terminals process orders and allow movement of inventory to process and fulfill work orders. The CG warehouse floor becomes yours...transparency through technology. CG has terminals in-house for all of the leading shippers...FedEx, UPS, DHL, USPS as well as leading trucking firms.

-  Inventory Control, RF based Receiving, Put Away & Shipping
-  Web Based Inventory Visibility, Order Processing, Crystal Reports
-  CG WMS Provides the Flexibility to Respond "Real Time"

Custom Goods provides Real-time Management of Customer Inventory on the Warehouse Floor
